Use Case:
1. User visits website.
2. User is provided with a full menu, sorted by -PRICE-
3. User applies additional sorting or filtering to the menu.
4. User adds an item to their "cart" and the "cart" is displayed.
5. User goes back to menu and repeats process until order is finished.
6. User can "check out" when they are satisfied with their order. -NOT IMPLEMENTED-
